SUMMARY

Self-driven BBA graduate transitioning into front-end development (hopefully, a full stack developer by the end of this year) through structured self-study (The Odin Project) and hands-on project building. Combines a business analytics mindset with growing technical skills in HTML, CSS, and JavaScript to build clean, functional web interfaces. Eager to contribute to a team environment and grow into a full-stack role.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+)

Tools: Git, GitHub, VS Code, Chrome DevTools

Design: Adobe Photoshop & Illustrator

Concepts: Responsive Design, DOM Manipulation, Flexbox, CSS Grid and many more

Exploring: React (in progress), Node.js, and more

PROJECTS

Phasi+ — Tax Platform for Thailand (Personal)

HTML · CSS · JavaScript | 2025 – In Progress

- Designing and building a fintech web platform for Thai and non-Thai users to calculate taxes and understand next steps.
- Developing an interactive UI with a product vision focused on multilingual support, educational guidance, and a clean fintech-inspired design (blue/purple palette).
- Defining full product scope, including a tax calculation engine, “what to do next” user flows, and a resource library for filing references.

Day Dreaming — Visual Productivity App (Personal)

HTML · CSS · JavaScript | 2025 – In Progress

- Building a visual note-taking web app where users interact with ideas as floating cloud notes on a digital board.
- Implementing features such as color-coded categorization, free positioning, and transforming thoughts into actionable tasks.
- Focused on creating a more intuitive and engaging experience compared to traditional to-do and note-taking tools.

Paso—Running Community App

HTML · CSS · JavaScript → Next.js · TypeScript | 2025 – In Progress

- Building a web app for Bangkok runners to find compatible running partners, matched by pace, location, time of day, and run type.
- Implementing features including runner matchmaking, group run discovery, community events, and curated Bangkok routes with live weather and air quality data.
- Designed around a real personal pain point — built as a self-taught developer shipping a product I actually want to use.

BePartner—Business Matching Platform

Next.js · React · TypeScript · Tailwind CSS · Supabase · Vercel | 2025 – In Progress

- Building an early-stage B2B matching platform for Thai SMEs and corporate buyers to find partners, suppliers, and buyers without relying on trade expos or cold outreach.
- Implementing core features including business profile creation, industry and tag-based search, a tag-overlap match score algorithm, and a mutual connect flow that reveals contact details only after both parties accept.
- Designed with bilingual (Thai/English) support and built as a self-taught developer learning full-stack development by shipping a real product with a real market problem.

EXPERIENCE

Co-Founder & Product Lead (CEO/CTO)

Sandbox — Friend-Finding Mobile App · ABAC Thesis Project · 2025-2026

- Conceptualized and led development of a friend-finding application as a college startup thesis project.
- Acted as both CEO and CTO — defined product vision, managed scope, and outsourced engineering to an external dev team.
- Pitched the product to real investors, presenting business model, user value proposition, and go-to-market strategy.
- Gained practical experience in product thinking, cross-functional coordination, and early-stage startup execution.

Content & Portal Intern

KoPunGun (KPG) — Study Abroad Consulting Center · Bangkok, Thailand · [Year], 3–6 months

- Contributed to the development of KPG Portal, a student-facing platform guiding users through study abroad visa and application processes.
- Curated and organized educational content (guides, checklists, key information) to improve clarity and usability for prospective students.
- Worked cross-functionally to ensure portal content accurately reflected multi-step visa workflows for the U.S., Canada, and the Philippines.
- Gained hands-on exposure to digital product workflows, information architecture, and user-oriented content design.

EDUCATION

Associate of Arts (AA) — Liberal Arts & Political Science Track

Shoreline Community College · Shoreline, WA, USA · 2021 – 2022

- Completed undergraduate liberal arts curriculum with a focus on political science, critical thinking, and academic writing in an English-language environment.

Bachelor of Business Administration — Design & Digital Innovation

Assumption University (ABAC) · Bangkok, Thailand · Graduated 2026

- Interdisciplinary program spanning business, Technology & innovation, design thinking, and personal & organizational development.
- Trained to think as a digital entrepreneur—combining business strategy, design sensibility, and tech-driven innovation.
- Curriculum included real-world business ownership experience, industry internship tracks, and foreign language emphasis.

The Odin Project—Foundation Full Stack JavaScript Path (Full Stack Dev Course)

Self-directed online curriculum · 2024 – Present

- Completed Foundations and progressing through the JavaScript Developer (or Full Stack Developer) course

ADDITIONAL

Languages: Thai (Native), English (Professional working proficiency)

Design Tools: Adobe Photoshop, Illustrator, Canva, Figma
